=

We are happy to have been the construction partner on Mattawan Consolidated Schools new Athletic Team Room. Part of the 2018 Bond Approval, their new athletic teams building features a "home" and an "away" locker room, as well as a separate referee locker room, public restrooms, and new concessions stand.

AVB is proud to have completed this 4,030 square foot facility on time and under budget. The building exterior design takes cues from the existing campus structures, including grey brick walls with the school's blue spirit color accenting the gutters and down spout. The interior also sports the schools blue and yellow and includes project screen, white board, and built-in benches for team meetings.
