29080 Red Arrow Hwy  
Paw Paw, MI 49079

Architect  
Williams Architects  
500 Park Blvd, Suite 800  
Itasca, IL 60143

The City of Portage selected AVB to represent their interests as their Owner Representatives for the exciting replacement for the oldest fire station in Portage, Fire Station #2, built in 1974. The focus of design for this new station is to improve overall wellness. This initiative is accomplished by adding “clean” rooms to the station to help prevent cross-contamination and the spread of carcinogens; all in an effort to prevent cancer. Additionally, the new layout allows for better in-house training and individual sleeping quarters to accommodate both male and female firefighters.

The new 18,300 square-foot fire station features a four-drive apparatus bay, hose tower and storage, workroom, offices, lobby, day room and kitchen, sleeping quarters, locker rooms and fitness room. AVB acted as the owner representative and managed this project on the owner’s behalf. This project was designed by Williams Architects and constructed by Hall Builders.

BUILD SOMETHING BETTER.
