Restaurant - Remodel

This 5,000 square foot remodel project of the BraVo! Restaurant & Cafe included changes to the main banquet room, and an updated full service pub bar, with bar seating.

Throughout the entire remodel, AVB had to work closely with the owners to accommodate their unique schedule. Construction could only occur during the mornings so BraVo! could convert the space back into a full functioning restaurant by 11am for lunch. This took extensive communication between AVB and the owners to ensure no business was lost during the remodel.

The successful remodel was completed between 2006 and 2007.
